Thermal TIG0601

LDS A1 2025.11

Thermal TIG0601

Thermal TIG0601 is a kind of thermal grease material with low viscosity and low thermal resistance. The material can be applied on heating devices and heat spreader surfaces by printing or dispensing. Due to good wetting between the interfaces after assembly, the contact thermal resistance will be substantially reduced to improve heat dissipation efficiency.

Features

Low Thermal Resistance

Low Viscosity

High Reliability

Screen Printing

Applications

Laptop CPU CPU

Communication equipment

Power supply controller

ADAS

All technical information stated in this technical data have been confirmed that all the technical parameters are reliable after harsh testing and evaluation of the products. Before you use our products, please carefully evaluate and decide whether the product meets your requirement and you need to take all the risks and responsibilities to use.
