Thermal GP0200

Features

- Thermal Conductivity
  2.0 W/m·K
- Natural Tackiness
- Low Compress Stress
- Low Thermal Resistance

Applications

- Consumer Electronics
- Network Equipment
- VoltaqA 10 9PémÎ/&

All technical information stated in this technical data have been confirmed that all the technical parameters are reliable after hard testing and evaluation of the products. Before you use our products, please carefully evaluate and decide whether the product meets your requirement and need to take all the risks and responsibilities to use.
